

For UAS-operations in Austria, one must ensure that the mitigating measures submitted in the original risk assessment are appropriate to the new operational environment where it is planned to operate in or update them if necessary. Check all the following aspects with the red boxes for local conditions:

Key aspects of **national aviation regulations** (*Luftfahrtgesetz, LFG; Luftverkehrsregeln, LVR 2014*):

- Insurance confirmation with minimum sum of 750.000 SDR
- Aerodrome safety zones
- Control zones
- Restricted areas (e.g. LO R 15 / Vienna)
- Right of way for manned aviation in all cases

Geographical zones applicable for UAS-operations are available on our **online map** (map.dronespace.at) or through the App "Austro Control Drone Space". The contact information for coordination with air traffic control units is also available online.

Please be aware that certain areas in Austria may need **additional authorization** from different entities (e.g. federate states are responsible for nature reserves). The applicant is obligated to contact all responsible entities before the UAS operation.

With regard to **icing**, operation is prohibited when the ambient temperature is below 0° Celsius for VLOS-operations or 5° Celsius for BVLOS-operations and relative humidity is above 90%.

For an **Emergency Response Plan** the local emergency telephone numbers as well as the Occurrence Reporting Tool **ECCAIRS2** need to be included:

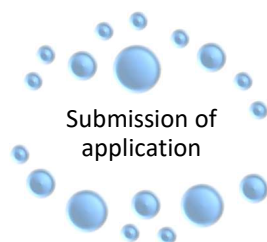

Fire Service 122

Police 133

Medical Service 144

[ECCAIRS 2 Central Hub](http://ECCAIRS2CentralHub.com) | [Home \(aviationreporting.eu\)](http://Home.aviationreporting.eu)

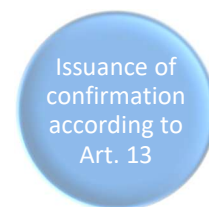

Application process for cross-border operations / operations outside the state of registration according to Art. 13 of Implementing Regulation (EU) 2019/947:

Submission of
application

Verification of
documents by
Austro Control

Issuance of
confirmation
according to
Art. 13

The application must include the following documents:

- **Application form**
(www.dronespace.at/downloads)
- **Copy of operational authorisation** from state of registration
- **Local mitigation measures**, including ground risk mitigation (M1, M2, M3) and strategic air risk mitigations

The applicant will receive the confirmation via e-mail and a printed version and invoice via mail. In addition, a copy of the confirmation will be sent to the CAA of the member state of registration.
